

EconEdLink: How Much is that Doggy?

Draw a line from each animal to the area that it would be most happy living.
Some animals might be happy living in more than one area.

The illustration shows a collection of animals on the left and three living environment options on the right. The animals are: a green parrot, a brown dog, a white duck, a brown cow, a pink pig, a brown cat, a green turtle, a white rooster, a brown horse, and a yellow and blue striped fish. The living environment options are: a Farm (with a red barn and silo), an Apartment (with a multi-story brick building), and a House (with a small red house). A large Venn diagram consisting of three overlapping circles is positioned in the center, intended for students to draw lines connecting each animal to its preferred living environment.
